

Akshat Jain

+91-971 848 9749, zenakshat@gmail.com, <https://in.linkedin.com/in/akshat1>

Profile Summary:

- ✓ 7 years 8 Months of industry experience includes:
 - On-Site Exposure to work with client on day to day basis and participated in solution planning & designing.
 - Designing and development of complex web application based on JAVA and J2EE.
 - Providing design and implementation for the integration between different systems using RESTful and SOAP based web services.
 - Worked on estimation of effort, requirements gathering and performed requirement analysis.
 - Worked closely with client for requirements changes w.r.t. business work flow and delivery acceptance.
 - Extensive work experience in all phases of SDLC including requirement gathering, business analysis, architecture design, implementation, testing, deployment and support.
 - Delivered more than 10 projects using Agile/Scrum development strategy.
 - Well versed in OOPS concepts.
 - Good Knowledge of “Alfresco” the Enterprise Content Management Systems.
 - Well aware of JAVA Portal Development based upon JSR-286 along with good exposure to Liferay Architecture.
 - Used Restful API's and Java-SDK provided by cloud platforms like GDrive, Box, Dropbox and Onedrive.
 - Good configuration and working Knowledge in Version Control system like SVN, GIT.
 - Have experience in Complex Troubleshooting in existing enterprise level applications.

Professional Experience:

- ✓ DRG Insight and Analysis Pvt. Ltd.
 - As Lead Software Developer since Jan`17 - till date
- ✓ Algoworks Technologies Pvt. Ltd., Noida
 - On-Site day to day interaction with client for project planning and to facilitate the communication channel with off-shore from Jan-2015 to March-2015 at SFO, California USA.
 - As Team Lead since Oct`14 - Dec`16
 - Technical Lead for 2 years, Oct`12 - Sep`14
 - Senior Software Engineer for 6 months, Apr`12 - Sep`12
 - Software Engineer for 2.2 years, Jul`10 - Sep`12
- ✓ Saral Softech, Ghaziabad
 - As Programmer for 9 months, Sep`09 – Jun`10

Professional Qualification:

B.Tech (Computer Science & Engineering) 2009, ABES Engineering College, Ghaziabad, UPTU, Lucknow.
SCJP 1.5 certification in Feb`09.

Technical Skill Set:

Programming Languages	JAVA(A)
Web Technology	J2EE(A), JSTL(A), HTML(A), XML(M), XSLT(M), FTL(A), JavaScript(A), Ajax(M), JSP(A), JSP Framework(B)
J2EE Technologies	Spring(A), Servlet(A), JSP(A), JSR-286(A)
JavaScript API	Dojos(M), jQuery(M), YUI(M)
ECM System	Alfresco(A): Webscript development(A), Workflow development using Activiti(A) & jBPM(A), Customization(A), Dashlet Development(A), Custom Actions(A), Job Scheduling(A), CMIS Queries(M), Web Content Management(M).
Portal Framework	Liferay(M): Portlet Development(A), Hooks Development(A), Theme Development(A), Service Builder(A), Asset Framework(M)
Cloud Platform API	Google(M), Box(M), Dropbox(M), Onedrive(M)
Version Control System	SVN(A), GIT(A)
IDEs	Eclipse(A), IntelliJ(A)
Operating System	Windows(M), Linux(M)

Proficiency level:	A – Advance, M – Medium, B – Beginner

Projects:

Insight - Platform	We are developing a product which gets used to deliver the various reports to the clients. These reports are generated by the author using Kand later gets transferred to Alfresco where analysts filter information and prepare the information packages which will then gets delivered to the drupal and now it's drupal responsibility to showcase these reports to the clients.	Alfresco 5.1, Kentico, Drupal
Lead Software Developer: Interaction with Business Analysts, Solution Planning, Team Guidance and Management and Design and Development of the product.		
XCMS	Our client is leading education material provider in India. They develop the content for elementary, junior and middle standards facilitate the understanding of students about the topics and to help the teacher to improve their teaching methods, so that students can understand and learn quickly. The process of the education material development is multi steps and has many users with different roles participating in it. Our primary goal is to automate this content development process so that proper task assignment could be done one after another and the manager can track down the status report any time. Another objective of the project is to build a organized repository so that any content can be tracked down from the system for reuse and as well as for reference.	Alfresco 5.0.d, Activiti, Amazon S3 Integration with Alfresco, Dashlet Development, Google Drive integration, Custom Actions, Webscripts, Content Modeling.
Team Lead: Client Interaction, Requirement Gathering, Solution Designing, Task Planning and Allocation, Delivery product.		
Nitro Cloud (Integration with various Cloud Systems)	Nitro Cloud provide sign/share service for the documents. We have integrated it with various external system to get the document and upload the signed copy back to its source.	Play Framework, Restful API of Salesforce, Google Drive, Box, Dropbox, Onedrive, OAuth2.0
Team Lead: On-Site Client Interaction, Solution Planning and Consulting, Task Allocation and responsible for best delivery of quality product.		
NCMS	Our client is a leading construction education content provider of the United States, so we have to make their content development process online. We have also planned the storage strategy for the documents.	Alfresco 5.0.b, Activiti, Dashlet development, Action Development, Webscripts, Content Modeling, Box Drive integration with Alfresco
Team Lead: Client Interaction, Solution Planning, Task Allocation, Development		
iXBRL Conversion Service	It would be used by Deloitte as iXBRL conversion service to convert business and financial documents of its customers into iXBRL format. There were various challenges involved in the project ranging from security of the documents to managing the complex workflow involved in conversion cycle of a document. There was a requirement to provide multi tenant architecture so the iXBRL conversion service can be used by many organization. Managing the versions of documents in conversion cycle so as to them in reporting was also a major challenge. Another major challenge was to handle the permissions for performing role specific tasks by various users of the system.	Alfresco, jBPM, Liferay 5.1, Spring, Lucene Search, MySQL, Tomcat 6.x, SVN, Apache POI, Apache commons libraries.
Technical Lead: Client Interaction, Analysis and Solution Planning, Development, Guiding Team members		
Parking Ticket Management System	We need to provide a system for managing parking tickets which was issued to rule violators in London. The system is capable of uploading tickets from various locations i.e. web, ftp, mobile and database.	Alfresco 4.2.c, Dashlet, Actions Development, Customization of detail page, Content Modeling, Job Scheduling, Offbiz etc
Technical Lead: Client Interaction, Analysis and Solution Planning, Development, Guiding Team members		
Lawfirm	Project involved development of a web based application, which would be used by a US based law firm. This application provides	Alfresco 4.0, Liferay 6.1, Spring, Lucene Search, MySQL, Tomcat

	step by step management of the process involved in getting professional/working visa in US.	7.x, SVN, Apache commons libraries.
Technical Lead: Analyzing the requirement, designing & development of the application		
DOX - A Document Repository	This application integrates with the Alfresco to provide various functionalities for document management as per the role assigned to the logged in user. It also let the user to share the document with each other.	Alfresco, Liferay 5.1, Spring, Lucene Search, MySQL, Tomcat 6.x, SVN, Apache's POI, Commons & Chemistry libraries CMIS
Technical Lead: Analyzing the requirement, designing and development of the application, assisting the teammates		
ASAHIKASEI	A web application is developed by embedding DOJO API into presentation webscripts of the alfresco. In this repository we had implemented the category based creation/uploading of the document. For the creation/editing of a document we embedded TinyMCE a WYSIWYG editor in the system. Keywords as well as properties based search was implemented. Two way relationship between the documents and role based visibility of the repository was implemented.	Alfresco, Lucene Search, JSON, DOJO, CSS, JavaScript, TINYMCE, Apache-Tomcat, Eclipse IDE and My SQL.
Senior Software Engineer: Analyzing the requirement, designing and development of the application		
WCM-website	A Website was designed and developed in Alfresco Web Content Management. The website was developed using Web Forms. Web forms are developed using by XSD.	Alfresco Web Forms, JSP, XSD, Free markup template, CSS, JavaScript.
Senior Software Engineer: Analyzing the requirement, designing and development of the application		
Content Designing flow Management	We have to develop the workflow as per the client requirement, along with capturing some data during the workflow later we have to export various reports based upon the input data	Alfresco, Activiti, Dashlet development, Webscripts, Jasper Reports
Software Engineer		
Metropolia Portal	The project involved the development of a portal solution based on Liferay to be used by one of the largest universities of Finland for managing its courses. The documents involved in the system will be handled by Alfresco. The challenging part was to integrate Liferay and Alfresco. The other important challenge was to migrate the data and documents from existing system to the Alfresco. Apart from these, managing the distribution of work efficiently among onsite team and offshore team and integration of various modules involved in project was also a huge challenge.	Alfresco, Liferay 5.1, Spring, Tomcat 6.x.
Software Engineer		
Softbless-gur	The project involved the customization of default web client of alfresco 3.4.b. Key customization was done in property sheet of a node like 1) Entries in a drop down list depends on selected value in another drop down. 2) On selecting a specific value in a drop down some more property will be visible etc.	Alfresco 3.4.b.
Software Engineer
